Messages of

## Founder & Chairman

### ALI MOHAMMAD REJALI

Strive to enrich society, both materially and spiritually, while contributing towards the preservation of the global environment.

We are attempting for even higher levels of excellence as a 21st century company that is contributing to the society with the world's most innovative technology.

### Member of Board

**Hamid Reza Rejali**

Maintain principles of transparency & openness, conducting business with integrity & fairness.

### Member of Board

**Mohammad Reza Rejali**

Expand business, based on an all-encompassing global perspective.

## Who we are?

ZARIF-MOSAVAR Industrial and Production group started its work Since 1984 as well as the establishment of Regal company. Its primary activities were focused on the production of carpet and fiber products. During the past years, Zarif-Mosavar group has been developing its activities in various industrial fields including textiles, chemicals and polymers, Regal petrochemical (as the first Iranian Private Sector Petrochemical Company), modern construction, engineering & architecture, energy and agriculture along with the establishment of several companies in Iran and abroad. The group has arranged its activities at the forefront of business and technology planning and development, by utilizing its past experiences and specialist experts.

The Zarif-Mosavar group is considering the general purpose of serving the society through the creation of professional investment fields in the strategic and early productive industries along with developing and investing of its public centers construction in new markets and technologies. We are trying to develop a purposeful and coherent development.

## Our Mission

We are dedicated to supply the products by the highest quality, with a reasonable price to achieve worldwide customers satisfaction.

## Our Vision

To be globally recognized as the preferred partner, as well as developing and attracting talented people for our international team.

## Our Strategy

Fit for the future

Our industry is changing at a pace not seen in decades. Through new technologies, energy will be produced more efficiently and in new approaches to help meeting the expected rise in demand. We are arranging our strategy to make us competitive in a time when prices, policies, technologies and customer preferences are changing.

## Core Values

We have values that express our common understanding of what we believe, how we aim to behave and what we aspire to be as an organization.

Everyone who works for Zarif-Mosavar group is led for a day in and day out by our values: Integrity, client focus, excellence, innovation, flexibility, leading the way, quality, learning & improvement, sustainability, partnership, efficiency, commitment and community satisfaction. In a fast-changing world, these values provide continuity and a shared point of reference for every action which we take and every decision we make.

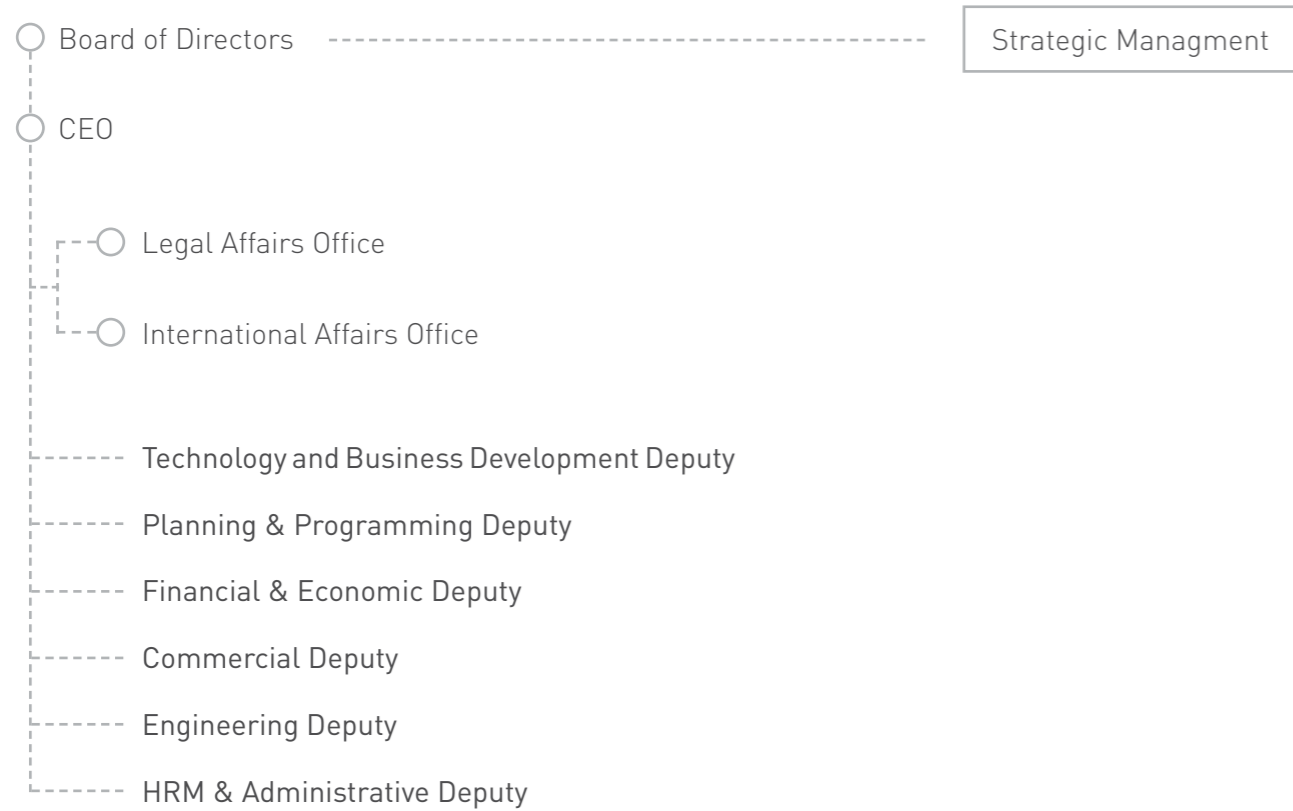

## Our Promise

We create added value by appreciating the needs of our customers with competitive and innovative solutions.

The needs of our employees are adhered to our company values. The needs of our shareholders with above-average returns and the needs of our environment by acting sustainably.

## Zarif Mosavar

ZARIF MOSAVAR INDUSTRIAL GROUP, as one of the biggest manufacturers of wall-to-wall carpets in Iran, commenced producing wall to wall carpets with an annual capacity of, 5000,000 M2, while Its present production capacity is about 50,000,000 M2 annually.

The diverse nature of today's world business requires manufacturing industries to provide fine and qualified raw materials. To ensure the product's quality and effectiveness, ZARIF MOSAVAR INDUSTRIAL GROUP started producing its required raw materials including Masterbatch, Polyvinyl Acetate Homopolymer, Synthetic Fibers and Textile Oil by itself a few years after its establishment. In addition, the company is also capable of manufacturing industrial goods such as Nonwovens, Automotive Carpets, Geotextiles, Geomembranes, and GeoComposites.

Zarif Mosavar industrial group is the first carpet manufacturer in Iran which has received the 26th international Trophy for quality from France in 1998.

Today, ZARIF MOSAVAR INDUSTRIAL GROUP is honored to hold the following certificates :

- The observance of consumer rights certificate from Ministry of Industry, Mine and Trade in 2012
- ISO 9001:2008 Certificate from IMQ in 2011
- ISO 9001:2008 Certificate from IQNet in 2011
- ISO/TS 16949:2009 Certificate from IMQ in 2011
- Chosen as exemplary exporter by Trade Promotion Organization in Iran (2008)
- International trophy for quality 1998 (Paris )

One of the most outstanding projects of this group is construction and exploitation of a petrochemical plant named Regal Petrochemical Company for manufacturing full-grade polypropylene granules.

Textile

## Melt Spinning

Zarif-Mosavar Industrial Group started its activities in Boroujen Industrial Zone in 1984 and its Head office is located in Esfahan. Fiber and thread production unit was also founded in the same year along with other production sections. The quality of our final products indicates high quality range of applied raw materials in the process of our internal production. Continuity of the successful activities of our complex, credibility and popularity of the brand, market demands, different acquired certificates and awards from various national and international institutes all verify the point that quality has always been the priority of Zarif-Mosavar in all the required levels. Various modern production lines, advanced QC laboratories and specialist experts have come together for Zarif-Mosavar Group to produce and supply the best products to the consumers, the same as before.

TIS company was established in 1999 as one of the subcontractors of Zarif-Mosavar Industrial and Production Group by the goal of Masterbatch manufacturing.

The company has been in this business for more than a decade and since its inception we have used the latest machineries and equipments, laboratory and semi-industrial facilities which are based on the domestic technical knowledge.

Tis Company has been manufacturing various types of masterbatches of fiber and yarn (CF, BCF, POY) Based on various polymers of polypropylene (PP), polyethylene (PE), polyester (PET) and polyamide (PA) for using in textile industry.

Resinpolymer is one of Zarif-Mosavar subsidiaries with more than two decades of experience in oil and resin manufacturing. Our technical experts have designed specific water-based emulsions for a wide range of applications.

Our products include vinyl acetate homopolymers, styrene-acrylic copolymers, vinyl-acrylic copolymers, pure acrylic copolymers, XSBR latex, spin finish oils & textile softeners.

Poly vinyl acetate (PVAc, poly(ethenyl ethanoate)), commonly refer to wood glue, white glue, carpenter's glue, school glue, or PVA glue) is an aliphatic rubbery synthetic polymer with the formula  $(C_4H_6O_2)_n$ . It belongs to the polyvinyl esters family with the general formula  $[RCOOCHCH_2]$ . It is a type of thermoplastics. As a water-based emulsion, PVAc is used as a good adhesive for porous materials, particularly for wood, paper and cloth.

Stiff PVAc homopolymer can be used as base resin in paint and other coatings as binder in nonwovens, glass fibers, filter paper and textile finishing.

Yalda Co. is one of the affiliated companies of Zarif-Mosavar, which produces geosynthetic products (geomembrane, geocomposite and geotextile) by modern European technology and equipments.

Our Geomembrane product is one of the best in the Middle East which is certified by SGS Inspection Company according to the GM13 standard of the United States.

As a fact Yalda's polyethylene geomembranes are the products of thin impregnated polymer sheets which are used as coatings and safety containers. The remarkable features of these products are high UV resistance, durability and flexibility. They are widely used in various industries such as oil, gas and chemical industries, water and sewage, landfill, agriculture, fisheries and mining...

Tebyan Rahbord Parsi (TRP) company has been established and equipped by fully automatic production lines which are under license of Schnell House and Tecnodinamica from Italy by «TRP» brand.

Due to achieve the goals and self-sufficiency, TRP attained to the knowledge and advanced technology and now this company is one of the largest building insulation material producers in Iran, by the view of energy saving and environmental protecting attitudes.

REGAL Petrochemical Co. is currently owner of a plant which is located in the petrochemical special zone of Bandar-e-Imam Khomeyni, south west of Iran. The plant will be capable of producing 220,000 tons Polypropylene from liquid Propylene annually.

The Novolen Technology has been suited for production of Polypropylene (Homo-Random-Impact & Ter Polymers of different grades), the Licence & Basic Engineering are done by ABB LUMMUS and the detail engineering of the project has been accomplished by an Iranian engineering company which is internally affiliated with Regal Petrochemical Co.

# Nafis

Nafis Agricultural and Nursing Complex has been launched in 2007 on the area of 30 thousands square meters in Isfahan.

Our goal is to set up an exquisite flower collection to achieve a large part of the flower market share in the region, which has succeeded with updated knowledge and equipments and by the usage of domestic soil and water, our flower product has a lot to say.

At present, we have the largest fully automatic hydroponics smart Greenhouse in Iran, with 20,000 square meters of cut flowers and 10,000 square meters are dedicated to the production of Orchid flower and Anthurium.

The most advanced heating and cooling systems, automatic fogging and monitoring system cause the perfectly natural condition for flowering and in addition the full automatic packaging system without human intervention has resulted in premium quality for most of the varieties which are delivered to the consumers.

Nafis also established the biotechnology center due to achive new methods and technologies in the near future.

## Industrial Group Energy

Our group continues to strengthen its profit base by optimizing our business and asset portfolio, so that we can deliver consistent profits even in the period of high uncertainty and potentially low oil price environment. We will continue to contribute for the sustainable and stable energy supply to the society by steadily expand of value chain in our natural gas-based technologies.

Energy systems are changing fundamentally and fast.

In consideration with The importance of individual energy sources and because of changing the options of power generation, as the ways in which electricity is transmitted and distributed, Power generation is getting more and more decentralized and making net management increasingly complex. Electrical consumption continues to steadily rise all over our Group.

## CSR

Taking the tenet of «benefiting people through science and technology» to heart, Zarif-Mosavar has been actively undertaking its due social responsibilities.

Over the past years, we have operated our enterprise legally and honestly. We have made efforts to create economic opportunities.

We consistently and continuously aim to satisfy our customer`s needs with high-quality services and products and is reward our shareholders with a sound investment and trust for ever-increasing achievements.

In the daily operations of the enterprise, Zarif-Mosavar strictly adheres to the relevant standards which protect the safety and health of our employees, customers and partners. We also try to reduce the environmental impact through continuous technical innovation and process optimization in order to improve energy efficiency and reduce carbon emissions.

Moreover, Zarif-Mosavar Co. actively monitors the development of the communities where our projects are located. Through public welfare programs, we try to advance local education needs and support areas which are hit by natural disasters.

To be an excellent corporate citizen, Zarif-Mosavar still needs to improve its efforts, but by keeping our social responsibility at the forefront of our daily activities, we have already taken a significant step toward reaching to this goal.
